Bagging-Palletizing Manager

South America

1 year experience with Claudius Peters bagging machines

5 years of experience in cement plants

About the project
A Bagging-Palletizing Manager is essential for maintaining the efficiency and quality of a manufacturing or distribution facility. They play a critical role in managing resources, ensuring safety, and meeting production goals in a systematic and organized manner.

Role
Supervision and Team Management: Managing a team of operators and technicians responsible for bagging and palletizing activities. This involves scheduling, training, and ensuring a safe working environment.
Quality Control: Ensuring that products are properly bagged, labeled, and palletized in compliance with quality standards and industry regulations. This involves routine inspections and maintenance of equipment.
Equipment Maintenance: Overseeing the maintenance and repair of bagging and palletizing machines to minimize downtime and ensure a smooth production process.
Inventory Management: Monitoring and maintaining an inventory of bags, pallets, and related supplies to prevent shortages or overstocking, which can impact productivity.
Efficiency and Productivity Improvement: Implementing strategies to optimize the bagging and palletizing processes, such as reducing waste, improving cycle times, and enhancing overall productivity.
Cost Control: Managing the budget for the bagging and palletizing department, making cost-effective decisions regarding equipment purchases, staffing, and other operational expenses.
Safety and Compliance: Ensuring that safety protocols and regulatory requirements are followed, which includes training employees on safe operation practices and maintaining compliance with relevant environmental and safety regulations.
Communication: Collaborating with other departments, such as production, logistics, and quality control, to coordinate the flow of products and meet production schedules.

Requirements
Experience working with KPIs and monthly metrics.
Spanish language skills are essential.
